

Saving Storyboards to Assignments

- 1) Students can view the assignments from their Student Dashboard.
- 2) Students will click "Create a Storyboard" from the assignment page.
- 3) When students save and give their storyboard a title, the storyboard will save in the proper assignment.

If student storyboards do not appear under the proper assignment, click "Storyboards Without an Assignment" on the Teacher Dashboard.

Both students and teachers can update the assignment a storyboard is saved to by clicking "Change Assignment" beneath the storyboard's title.
